FIG. 6

FIG. 7

A cross-sectional view of a substrate 110. A layer 112 is formed on the top surface of the substrate 110. The layer 112 contains a pattern of openings 145 and 160. The openings 145 are rectangular and filled with a hatched pattern. The openings 160 are rectangular and filled with a solid black pattern. The layer 112 is shown as a continuous layer across the substrate 110.
